

Late
But now I really know what real is
And it's what I'm really after so I'll wait
It's fate
Slippery is time here
If it's really what you're after too
I will stay on back for you

So I knock knock knock
So I know that I'm invited
Can you just one time still the beating of my hear?
Make it stop stop stop
For tonight, forget my name
I saw the face of God
I was losing all sensation, baby

Just wait it out
Full of passion and I'm on attack
I can tell what's real and it's all that I want
Hands on me and she's all on my neck
Heart beat slows down down down
It's just us in the back, I feel nothing at all
But you, you're the only thing giving me life
Hand in hand locked lips, feel everything at
Once was mine I can't go on my own tonight
Just wait it out
Is it fate? I swear I never felt so alive
Oh time will tell
What's yours and what's mine?

Light
Passionate and slowly
I can feel the tie that holds me and it's tight
Tonight
You're really what I'm after
If I'm really what you're after too
I will stay on back for you

So I knock knock knock
So I know that I'm invited
Can you just one time still the beating of my heart?
Make it stop stop stop
For tonight, forget my name
I saw the face of God
I was losing all sensation, baby
