

My Favorite Phase

Wicca Phase Springs Eternal

Lips and [?] glowing in the corner of your room
I saw you on the website, but didn't know it was you
You say that there's no consequence
But then you give me pain
And you and my favorite phase

I remember what you said last night
I-I-I remember what you said last night
I remember what you said last night
I-I-I remember what you said last night

[?] from the corner of your room
I turn on my computer to watch the mirror of you
I fill your head with compliments
But it only brings me pain
As you and my favorite phase
I watch you watch them right away
But then she [?] another phase

I remember what you said last night
I remember what you said last night
I remember what you said last night
I remember what you said last night
