

# My Name Is The Endless Night

Wicca Phase Springs Eternal

Misery has company, I'm back  
The Lone One has come home at last  
Dark angel revealed once again  
The spelling that I worked on is cast  
Dark aura in tact  
Mystery has come to spread its wings  
A slippery and soft singing being  
A silence extending it's hand  
Complexity and sadness it brings  
The shadow is me

I ride through the valley but don't try to chase  
In the way that the moonlight reflects in two places  
I heard there's a portal off Morrison Way  
I'll take you there baby

Exist as a rumor  
Deal only in webs and lies  
My presence, an ember  
My name is the endless night

The frost on the grass, the way in which the wind blows  
The shapelessness showing it's face at the day's close  
The smoke that's obscuring the signs on your way home  
The magical whisper that creeps through the window

Hard to know, hard to see  
The messages sent to you say not what they mean  
The paths on the map don't lead where they say they lead  
The roads they don't meet  
The clouds, they obscure  
The patterns repeat

You can say the same for me  
In black gloves and white coat, the wolf and the sheep  
The clouds that hang over, the ponds that run deep  
The last missing piece  
The rider in black  
The pain that you need

Exist as a rumor  
Deal only in webs and lies  
My presence, a shadow  
My name is the endless night

I know there's a doorway  
I know where the secrets hide  
Dark prince on the mountain  
Dark days lead to endless nights

I hold on to romance  
Remember the place and time  
Of my dark beginnings  
When I saw the other side

I know there's a doorway  
I know where the secrets hide

Dark prince on the mountain  
Dark days lead to endless nights
