

# On A Mountain Under Full Moon

Wicca Phase Springs Eternal

I've been noticing the numbers  
How the patterns keep repeating  
When I'm caught up in a moment  
When I'm caught up in a feeling  
It's the mystery I'm after  
It's the magic I believe in  
On a mountain under full moon  
I could say goodnight and mean it

I used to think hard about our pact  
About the path we're on  
But now it's beyond the nights in black  
The club lights flashing on

Once I heard about a crisis  
Tonight I'm hoping that it takes me  
You can find me under club lights  
It's the shadow I'm embracing

In your bedroom told me that you love me  
Then a long night never coming home, I can't  
But if you ever really love me  
You would say goodnight and set me free  
I don't really wanna make out  
I got somewhere that I have to be  
And I'm somewhere along  
The path that I've been off beyond the trees  
I'm headed out  
For California skies and west coast beach  
So don't you worry about me  
I kinda like this feeling  
I'm the master of my own world  
Riding in 'til the evening

In riddles and signs, in truths divined, I find romantic code  
Through trauma and trial, my heart, the diamond, holds for you and on  
ly  
Tonight I'm not tired, the night is mine and mine to hold  
And it's out to you I'm reaching baby at the the castle gates alone

I've been noticing the numbers  
How the patterns keep repeating  
When I'm caught up in a moment  
When I'm caught up in a feeling  
It's the mystery I'm after  
It's the magic I believe in  
On a mountain under full moon  
I could say goodnight and mean it
