

Satan Simulation

Wicca Phase Springs Eternal

See me as something
On my internet deluxe
My arm around the baby
You already talk too much
Find me holding heavy
In the blackest room of data
Tell you to come over
Initiate the beta
Someday baby maybe
You will see me last often
Vanish into nothing
Pray that nothing gets lost
Searching for my crystal
In the triple body sauna
Darkest prince of everything
Angel hanging next to me

Pass out on the holy grail
You think that I'm something else
You should be afraid of me
I can be your killer
She can leave her hair long
Let it be a part of me

Everything feels the same man
It's in my head
Tell me something strange
Satan simulation
Touch me on my tongue
Move your body slower
Used to be so lost here

Money on the pavement
Cause I know I'm worth it
You should be more loud
That's what makes me surface
That's what makes me surface

Everything feels the same man
It's in my head
Tell me something strange
Satan simulation
Touch me on my tongue
