

## Locusts

Widowspeak

All we had seen a dream, a dream within a dream  
All they could take it's hard to give when you're awake  
Oh, do you feel the way it is with something real  
Oh, when it ends you believe in it the way it starts again

And they don't know  
All that was left, maybe it was just enough  
If we where spied it's 'cause of what we made up

And they don't know  
And they know that they won't  
They'll never know what's true the way we do

Oh, you could feel they way it is with something real  
Oh, when it ends you believe in it the way it starts again  
And they don't know  
And they know that they won't  
They'll never know what's true the way we do  
They'll never know what's true the way we do  
They'll never know what's true the way we do  
They'll never know what's true the way we do
