

# The Drive

Widowspeak

Haven't they worked hard to deserve nice places  
And the open road filling in the spaces  
Always thought that you'd move on, but you never learned how  
Always thought that you would be in love by now

You could never really be  
What you never really wanted to be  
You could never really be  
What you never really wanted to be

You never had the drive  
You never had the drive

So you spent the week, the long overdraft  
When you noticed the first couldn't open the last  
But you know what it said, you were afraid to look  
You should have known better, should have had what they took

You could never really be  
What you never really wanted to be  
You could never really be  
What you never really wanted to be

You never had the drive  
You never had the drive  
You never had the drive  
You never had the drive
