

True Believer

Widowspeak

While we wake
On the stairs
While you gaze
All the way
We ride life
Hypnotized
Wild eyes
Nights so long
Speak in tongues
Play slow stream
Where's the heat
I feel on my arm
Fall asleep in our clothes
Feel it come
Something will change

Won't you stay a true believer?
Can't you be my real thing?
Shake off that heavy feeling
Keep your feet in your dream

With this love
What we said
Emotion rain
But I won't run
Spinning head
Smallest eyes
Broken flowers
Flower beds
Tangled cheeks
Tangled hair
I know you're there
I felt you breathing
Hear the names
Trying it
Feels the same
Something will change

Won't you stay a true believer?
Can't you be my real thing?
Shake off that devil feeling
Keep your feet in your dream

Won't you stay a true believer?
Can't you be my real thing?
Shake off that devil feeling
Keep your feet in your dream

Won't you stay a true believer?
Can't you be my real thing
Shake off that devil fever
Keep your feet in your dream
