

While You Wait

Widowspeak

Watch the world, it's just turning on
Someone left the lights burning all night
Someone was up, working in the quiet
Now it's broken by their morning song
How can I help you, what do you need?

Strange days overwhelmed me
I keep my mind on the task at hand
Stitches in satin, making plans

While you wait
We'll have it done today
While you wait
We'll have it done today
While you wait
We'll have it done today
While you wait
We'll have it done today

Walking home, watch the world close
Hear a song spilling out from a hole in the wall
See the windows glow from across the street
See the chain stitches, lined up so neat

While you wait
We'll have it done today
While you wait
We'll have it done today
While you wait
We'll have it done today
While you wait
We'll have it done today
While you wait
We'll have it done today
While you wait
We'll have it done today
While you wait
