

## From Here

Wig Wam

I never told you we would last forever  
I never told you we would never part  
I'd only treasure our moments together  
But it's all right now

And all you wanted was my true devotion  
And all you wanted was a promised man  
You'd only want something real to hold on to  
Well it's all right now

Cause when you reach your destination  
The ragged road that lead you there  
Is way beyond your hearts attention  
And everywhere you go, I'll go  
We'll travel together from here  
From here

It's such a fine line between pride and passion  
It's such a tough one when your heart's at stake  
We'd been challenged by the hurdle of offers  
But were all right now

Cause when you reach your destination  
The ragged road that lead you there  
Is way beyond your hearts attention  
And everywhere you go, I'll go  
We'll travel together from here

And though we made the hardest distance  
We face new montains to be climbed  
But well use each others shoulders  
Carry each other to new heights

Cause when you reach your destination  
The ragged road that lead you there  
Is way beyond your hearts attention  
And everywhere you go, I'll go  
We'll travel together from here

Reach your destination  
The ragged road that lead you there  
Is way beyond your hearts attention  
And everywhere you go, I'll go  
We'll travel together from here  
I'll go, well travel together from here

And it's all right now.
