

Break Bones

Wild Child

Break bones
We slam phones
Scream and yell through the closed doors
You're mine, we'll combine and you're back home
So proud you shut down
You grow cold when it gets loud
You smile I get shy
And you're back home

It's getting too hard to pretend
too much to say I can't contend
There is more breaking here than we could ever mend

Tear it down
Feel it burst
If this ends we'll only feel worse
Can't forget that we were friends
If you decide these are just words
baby you and I will never learn
I hope this fight just never ends

Step back you unpack
Change our minds moving too fast
Can't leave I might bleed
If you're not home
Your skin wearing thin
Can't let go now you're back in
So tired, douse this fire and you're back home

It's getting too hard to pretend
Too much to say I can't contend
There is more breaking here than we could ever mend

Tear it down
Feel it burst
If this ends we'll only feel worse
Can't forget that we were friends
If you decide these are just words
Baby you and I will never learn
I hope this fight just never ends

I can't be still
You know I will
If I fall, I lost, then you win
I hope this fight just never ends
I can't be still
You know I will
If I fall, I lost, then you win
I hope this fight just never ends

Break bones
We slam phones
Scream and yell through the closed doors
You're mine, we'll combine and you're back home

Tear it down
Feel it burst

If this ends we'll only feel worse
Can't forget that we were friends
If you decide these are just words
Baby you and I will never learn
I hope this fight just never ends
