

Bullets

Wild Child

Oh, I'm so glad, you found a cure
It was so sad when you weren't sure
I know you think, we need to talk
You said, those regrets will burn a hole
In my black and withered soul
You're gonna think I'm wicked when I walk
Long nights, I get sad that you're gone
But I'm still smiling with the sun
I knew your bullets wouldn't stop

I know you think, I took a lot from you
I bet you think I don't like running too
I know I said that I would call you soon
I know you thought that I would come for you

Oh, years go by, we change so quick,
I guess my skin is gotten thick
I just know time will always bend
I know, it was great when I was good
So I can't love you like I should,
My heart is broke so it can't bend,
Oh sleep, coming fast, with the moon
Now I'll be dreaming of you soon
And in the morning it will end

I know you think, I took a lot from you
I bet you think I don't like running too
I know I said that I would call you soon
I bet you thought that I would come for you

I know you think, I took a lot from you
(I knew your bullets wouldn't stop)
I bet you think I don't like running too
(I knew your bullets wouldn't stop)
I know I said that I would call you soon
(I knew your bullets wouldn't stop)
I bet you thought that I would come for you
(I knew your bullets wouldn't stop)
I know you think, I took a lot from you
(I knew your bullets wouldn't stop)
I bet you thought that I would come for you
