

Reno

Wild Child

Late night
Driving long past the sunrise
I know you're feeling it too

There's no end to this road
But it's alright
I know my home is with you

I can't say why I'm acting this way
Oh darling who knows why I called
I knew you weren't awake

Late nights on the road
Didn't hear your call
Damn I hope you'd catch me when I fall

I know your mind goes running wild
But I'm always at your door
You treat like a child cos I've run before

But when they dim those city lights
Could search the whole world round
Always know my heart is in your hometown

Ghost town
I can just feel the calm down
This whiskey helps when it hurts

Nine miles
On the road south of Reno
Still see your face at each turn

Sometimes
These long nights ease my trouble mind
Help me forget about the pretty things I left behind

Late nights on the road
Didn't hear your call
Damn I hope you'd catch me when I fall

I know your mind goes running wild
But I'm always at your door
You treat like a child cos I've run before

But when they dim those city lights
Could search the whole world round
Always know my heart is in your hometown
