

# Take It

Wild Child

Don't just smile, when you look at me  
Because if you feel something  
You got to let it be said

Can't we both just play the trust game  
Because I know you're always a saint  
And I know it's a test, a test

Take it, take it, hear me say this  
How about trusting when I'm not around  
Break me or make it, believe me or fake it  
Just let it go and love what we found

Don't look back and make sure I'm watching  
Cause you know I can't see a thing  
That don't remind me of you  
Ask me for everything and still give me pieces  
Cause I ain't whole either babe  
But I ain't asking for help, oh for help

Days move fast and I know it hurts you  
But if we can't ask to slow down  
We might run out of breath

Take it, take it, hear me say this  
How about trusting when I'm not around  
Break me or make it, believe me or fake it  
Just let it go and love what we found

Take it, take it, hear me say this  
How about trusting when I'm not around  
Break me or make it, believe me or fake it  
Just let it go and love what we found

You know that I sleep better beside you  
And that I get lonely on nights when you're gone  
You need to believe I won't feel so damn evil  
I just can't imagine being on my own

You know that I sleep Better beside you  
And that I get lonely on nights when you're gone  
You need to believe I won't feel so damn evil  
I just can't imagine being on my own

Take it, take it, hear me say this  
How about trusting when I'm not around  
Break me or make it, believe me or fake it  
Just let it go and love what we found

Take it, take it, hear me say this  
How about trusting when I'm not around  
Break me or make it, believe me or fake it  
just let it go and love what we found  
Oh love what we found
