

All those nights, they bleed together for me  
I try to chase them out of the back of my mind  
Somewhere in the night I hear a voice  
It's saying something's there in the nights that we drove on and on

Some nights I wonder where you are  
Are you doing alright? Are you lost out in the dark? I wanna be there with you  
I wanna know, I wanna know why...  
I see your pale face painted in the back of my mind  
I wanna know now if those words are real

Somewhere I can't find the missing part  
That you locked in the middle of the black of my heart  
I wanna know if you are there  
Are you standing in the dark somewhere?  
Are you looking for me like I'm looking for you?  
Look up  
Look up

Some nights I wonder where you are  
Are you doing alright? Are you lost out in the dark? I wanna be there with you  
I wanna know why, I wanna know why...  
I see your pale face pained in the back of my mind  
I wanna know now if those words are real

When I speak to you, I speak to myself  
I wanna fight away the dark together  
When I speak to you, I speak to myself  
I'll carry that light for you forever
