

## Rain

Wild Cub

That still magic when it rains around here  
We used to stay up and we'd watch it pour down around us  
I still think of you on those lonely nights...  
When you used to dance so drunk in the bathroom light

I'll look for you like nothing else matters, I'll work for you  
night and day  
I'll look for you like nothing else matters  
And on and on...  
Just call my name

I wish that I had said so many things before you'd gone  
I wish that I could call you backwards, call you on the phone  
I wish that I could hear your heartbeat hanging on the phone  
Your crossed out letters don't live here anymore

There's children playing in the lot next door  
They ask about you, I say you don't live here anymore  
We all miss you back here, we think you're a big, big star  
So here's a thought for you, wherever you are

I'll look for you like nothing else matters, I'll work for you  
night and day  
I'll look for you like nothing else matters  
And on and on...  
Just call my name

I miss you, I miss you  
I think of you time to time  
You're on my mind  
I miss you  
It's this funny thing I do
