

Everybody thinks this, everybody thinks that  
With a bat and a bag of tricks  
Got something on my lips light blue in the summer  
Hopin' this will last forever  
On my knees floatin' up to heavens door  
With all my close acquaintances accounted for

And that's why that I'm convinced  
That you and I coexist  
Like laughter and pixie sticks  
We make what we feel and we feel this  
We make what we feel and we feel this

So take my heart, don't break it, baby, talk talk talk  
And don't mention what we feel through the day  
Cause any moment we can fill it up with how we feel in our heads  
On my knees floatin' up to heavens door  
With all my close acquaintances accounted for

And that's why that I'm convinced  
That you and I coexist  
Like laughter and pixie sticks  
We make what we feel and we feel this  
At night we just sit and talk about everything we got  
Like how everything just clicks  
We make what we feel and we feel this  
We make what we feel and we feel this

I'm shakin my head, I'm hangin' my clothes  
I'm takin' each breath like it's the last that I hold  
Not makin' much money, shut up, it's not funny  
Just wanna prepare, so she won't ever be scared  
And I'ma love her through the best  
And I'ma love her through the worst  
And I'ma love her when she's pissed  
And I'ma love her till it hurts  
I'm gonna love you through the worst  
I'm gonna love you through the worst

And that's why that I'm convinced  
That you and I coexist  
Like laughter and pixie sticks  
We make what we feel and we feel this  
At night we just sit and talk about everything we got  
Like how everything just clicks  
We make what we feel and we feel this  
(We make what we feel, we make what we feel)  
We make what we feel and we feel this  
(We make what we feel, we make, we make)
