

Get Up

Wild Party

Friends (friends)
We need healing let's begin (begin)
Newfound feelings
To defend we prey on details in our way

Don't let the daylight escape
Unscathed by the love you make

Get up every morning (get up)
Forward we are going (let's go)
See it pass full circle
Turning static purple (word!)
Blurry yet in focus
Clearest at the surface
All your time and worth 'cause you worked
So don't just take the easy way out

Call my friends
Hey call my brother
I don't want to be in my head, in my head
I don't need to be in my head, in my head
I just want to suspend my pain
With you here I'll be safe

Don't let the daylight escape
Unscathed by the love you make

Get up and get going (get up)
Forward only motion
See it pass full circle
Turning static purple (word!)
Blurry yet in focus
Clearest at the surface
All your time and worth 'cause you worked
So don't just take the easy way out
The easy way out

Once again we prey on details in our way

Don't let the daylight escape
Unscathed by the love we make

Get up every morning (get up)
Forward we are going (let's go)
See it pass full circle
Turning static purple (word!)
Blurry yet in focus
Clearest at the surface
All your time and worth 'cause you worked
So don't just take the easy way out

Get up every morning
Forward we are going (we are going!)
(Let's go)
See it pass full circle
Turning static purple (word!)
Blurry yet in focus

Clearest at the surface
All your time and worth 'cause you worked
So don't just take the easy way out where I can't find you
