

# Wait Up

Wild Party

Turn around on the way back  
Got word about a party we should be at  
Need you behind me in my rearview  
Now let's turn around and flutter in the sun  
Until everyone around us knows  
That the words we speak  
Will be on repeat

So let's move slow, be careful  
There's no rush, hey, wait up  
We only go higher  
We only see stars  
But there's no one that can replicate  
Who you are

I spent twenty eight years going my way  
Got lost, and then found on the highway  
With you beside me as a clear view  
Hey, let's run around and stumble just for fun  
Until everyone around us knows  
That the words we seek  
Can't be out of reach  
If you know we'll always be there for each other

So let's move slow, be careful  
There's no rush, hey, wait up  
We only go higher  
We only see stars  
But there's no one that can take your place  
Right next to me

I can almost see it clear  
Without fear it can appear to be all that we know  
You're not alone  
And every time you're near to me  
It's plain to see the truth is somewhere in between

So let's move slow, be careful  
There's no rush, hey, wait up  
We only go higher  
We only see stars  
But there's no one that can replicate  
Who you are  
Who you are
