

## Astronaut

Wilderado

I can't remember if you asked or not  
But I've been feeling like an astronaut  
Up and down, yeah, I'm an afterthought  
Searching for meaning

I been looking for a different name  
A chance at starting in a better way  
They all say it's just my mental state  
And I need some healing

On and on it goes  
I'm a feather when the wind blows  
I'm the weather in the evening afterglow  
I can hear you say  
It gets better with the good days  
Don't you let it go and rip your heart away

I've been hearing that the west is won  
The world's been lost, but the west is won  
Which of us is going to teach the sun  
To keep on shining?

That's just something that I think about  
Instead of sleep, I try to figure out  
When to leave and start heading south  
For a long winter

On and on it goes  
I'm a feather when the wind blows  
I'm the weather in the evening afterglow  
I can hear you say  
It gets better with the good days  
Don't you let it go and rip your heart away

All I really know is I love it when you come home  
Yeah, I love it when you come home  
Yeah, I love it when you come home

On and on it goes  
I'm a feather when the wind blows  
I'm the weather in the evening afterglow  
I can hear you say  
It gets better with the good days  
Don't you let it go and rip your heart away
