

## Bad Luck

Wilderado

Happiness seems to happen less  
When you go where the season's best  
Winter snows and summer sets  
Saddle up boy, now, don't be shy  
Adderall in a lonely night of  
Alcohol and cigarettes

But if it goes well  
You find a lover, find a hotel  
You try another, try a carousel  
Later on, in the corners of your own hell  
You hide away and get by

Father, Son, and the Holy Ghost  
Who's the one that we need the most  
As easy come, easy go  
I get older and then I die  
I should know when to say goodbye  
And shake the hand, meet the eye

But if it goes well  
You find a lover, find a hotel  
You try another, try a carousel  
Later on, in the corners of your own hell  
You hide away and get by

But if it goes well  
You find a lover, find a hotel  
You try another, try a carousel  
Later on, in the corners of your own hell  
You hide away and get by

But if it goes well  
You hide away and get by  
But if it goes well  
You hide away and get by  
But if it goes well  
You hide away and get by  
But if it goes well  
You hide away
