

The Desert Song

Wilderado

My best friend is in the desert
With the girl I love
He'll give her his favorite sweater
Now she's warm enough

She leaves notes to say hello
This old love of mine
Should have found a hole
Should have found a way out

Smoke the moon high, watch the fire down
That's when that girl gets cold
I should've found a way out
But now they're on the long open road

My best friend is in the desert
With a girl I love
He'll give her his favorite sweater
Now she's warm enough
