

Let me take control of the ting, move over
I've lived in conditions way colder
Minus 40, remember, I told ya
At some point in your career, you've gotta be an owner
Ownership lives in those who make that paper
Wouldn't be here without Him so hail the creator
Aim for the stars and you might make it to the moon
I know we ain't all in sync now but we are gonna be later

25 MCs backstage chilling
Mandem are drinking, mandem are billing
I knew this already but my scene's winning
Changed your whole culture? My team did it

When they offered this much, I said no
When they offered that much, I said no
When they added some more, I said no
Can't do it, the money too low
I told them I run this sector
I'm the E3 energy collector
I roll in a team with Skepta
Wiley's a road yute, man sold food in a clapped out Vectra

Like "Wiley, when we going radio again?"
And I reply like "let me check, who's on bro?"
So I can make sure that it's cool with them
I know so many MCs who are all fire
It's the truth, don't call me a liar
If it ain't bars and skills then I don't wanna listen
I like to hear what's better, that's my main mission
