

## Danny Weed Freestyle

Wiley

You can't imagine how much energy it took to build this empire  
Right now I feel like I am standing in hell's fire  
My head is hurting I used too much brain power  
Relationships [?] that person 'til they turn sour  
I just turn to music, you can pay me by the hour  
It's my occupation, my job is to run this empire  
Eskiboy's that boy you couldn't see that clear but now I've  
Got the globe in my hand and I'm sure that you'll discover  
A part of this was created by me and my little brother  
Wiley Kat and Dizzee Rascal on the front cover  
They really want us to argue and go against each other  
But we both know that 'cause we both appreciate each other  
Trust is just a word, I don't trust my own mother  
Let alone a baby mother, don't trust baby mothers  
Especially baby mothers, who try and get their brothers  
Watch I'll turn the slowest other men into fast runners

Yo  
Eskiboy  
Yo  
It was me and Danny Weed who realised that we could do it  
People tried to shut the door on us, we got through it  
We wrote it down on the paper and whizz through it  
Roll Deep album was finished ready to be delivered  
To get a record deal is hard here but we can do it  
Hit the road and promote the album we gotta do it  
We had a couple of chances before you knew it  
We blew it up and they had to set, they saw us doing units  
I'm no longer human, I've become an investment  
It's just a gamble 'til you start to see recoupmen  
When you sign that paper it's a very big commitment  
So ask yourself if you really want commitment  
I'm overcoming fear but I'm scared of commitment  
You can tell me every rule about it but I wouldn't listen  
Many try but they can't stop me on my mission  
Because I'm too shabby on the road I'll make the whole world li  
sten
