

## What's On Ya Mind?

Wiley

[Verse 1]

We done what we came to do, leave the legacy  
I can't lie I feel drained, but my heart still looks for energy  
It gets carried away, hyped up like back in the day  
I take note of fans, I like seeing them having their say  
When it's all said and done  
We got to work for daughters and sons  
That's a job for parents  
But I know it might feel awkward for some  
Bringing up children, there ain't a manual  
You gotta face the stuff you can't handle  
Same way you gotta show love and do the stuff you can do  
I realize too many rules might block the creative system  
I got a message for my people worldwide  
Because I'm relating with them  
If you're going to take something from me, take the wisdom  
Use that, get the fire in your heart  
Make sure you change the system  
It's all good anyway because I know the youth's future is bright  
A place where the world's multicultural  
That's the future of life  
Believe these issues that we make issues won't be their issues  
I tell them, "Please try and value the time that humans misuse"  
On the real, though  
Face challenges  
Understand lawyers, managers  
Understand the point of business  
Learn, rise above amateurs  
Because if you don't, you're gonna be pointing [?] road to road  
Street to street, Ave to Ave
