

Oh-oh-oh

It's the energy that we make  
Electricity we create  
When you're near to me, I won't wake  
You're the light in me, illuminate  
You're the light in me, illuminate

It's the energy that we make  
Electricity we create  
When you're near to me, I won't wake  
You're the light in me, illuminate  
Illuminate  
It's the energy that we make  
Electricity we create  
When you're near to me, I won't wake  
You're the light in me, illuminate

You're the light in me, illuminate
