

Talk About It

Will Young

If only we could talk about it
All the things, all the things, all the things, all the things that I said
That I said

Love's left your eyes
Seems to me that it is over (Oh, oh)
Comes as no surprise
Never talk anymore (Anymore, anymore)

It's like watching fireworks break down in the dark
And if you touch me now I'd only fall apart
We stuck together, now I don't know what to say
And I don't recognise you anyway

If only we could feel this
So much in my heart
That I really need to tell you
If only you could see me
Through the pain and the heartache
Such a misunderstanding
If only we could talk about it
All the things, all the things, all the things, all the things that I said
That I said
If only we could talk about it
All the things, all the things, all the things, all the things that I said
That I said

Fading to black
All our colour's disappearing (Oh, oh)
Under attack
Can't defend anymore (Anymore, anymore)

It's like watching fireworks break down in the dark
And if you touch me now I'd only fall apart

If only we could feel this
So much in my heart
That I really need to tell you
If only you could see me
Through the pain and the heartache
Such a misunderstanding
If only we could talk about it
All the things, all the things, all the things, all the things that I said
That I said
If only we could talk about it
All the things, all the things, all the things, all the things that I said
That I said

If only we could talk about it
Walking on this thin blue line
Nothing ever stays the same
My love for you is so sublime
(Nothing ever stays the same)

If only we could feel this
So much in my heart
That I really need to tell you

If only you could see me
Through the pain and the heartache
Such a misunderstanding
If only we could talk about it
All the things, all the things, all the things, all the things that I said
That I said
If only we could talk about it
All the things, all the things, all the things, all the things that I said
That I said

If only we could talk about it
All the things, all the things, all the things, all the things that I said
That I said
