

# This Is Us

William Clark Green

I guess you'll always know me  
A little better than the rest  
We've seen love at its worst  
We've seen love at its best  
We have said some things  
We've come to regret  
It's funny looking back  
We sure put it to the test

From that first night when we first met  
To our first fight to make up sex  
From highest highs to lowest lows  
From I'm in love to I don't know  
From giving up to one last try  
To asking you to be my wife  
To never needing you so much  
From what it is to what it was  
This is us

They say that love is easy  
They've never really tried  
Yeah, we might disagree  
But you're always on my side  
Maybe that's the way  
We are both designed  
My hand just fits in yours  
Your hand just fits in mine

From that first night when we first met  
To our first fight to make up sex  
From highest highs to lowest lows  
From I'm in love to I don't know  
From giving up to one last try  
To asking you to be my wife  
To never needing you so much  
From what it is to what it was

After all that we've been through  
I'm never giving up on you  
It is what it is and that's just because  
This is us

From that first night when we first met  
To our first fight to make up sex  
From highest highs to lowest lows  
From I'm in love to I don't know  
From giving up to one last try  
And asking you to be my wife  
To never needing you so much  
From what it is to what it was  
This is us, mmm  
This is us, yeah, this is us  
This is us, mmm, this is us

And I guess you'll always know me  
A little better than the rest
