

Omnia Vincit Amor

William Control

Broken soul with angel wings
You become my everything
I'm accustomed to this prison life
Where pain is all I feel

Can you wrap your arms around me?
Can you hold on through the night?
Every scar you filled with love and praise
No more suffering

All my tears are gone
All my love
All my tears are gone
You have all my love

I surrender, take my control
I surrender all my love
I pretend you're here
I surrender fear
This game we play in love
I surrender

Broken soul with angel wings
I implore you not to fail
Every scar you filled with love and praise
I'm your offering

All my tears are gone
All my love
All my tears are gone
You have all my love

(2x)

I surrender, take my control
I surrender all my love
I pretend you're here
I surrender fear
This game we play in love
I surrender

Will violence change your mind?
Will you violate me?
Will violence change your heart?
You can violate me

All my life
All my love
I surrender everything that I've become

I surrender, take my control
I surrender all my love
I pretend you're here
I surrender fear
This game we play in love
I surrender
