

## Mjs Interlude

William Singe

Walking round feeling foolish  
At these girls on my phone acting stupid  
But I'm alone now because I walked out  
When I promised I could do this  
I get high not a balance of the loads  
Open my phone to delete our photos  
It's hard to admit, but I know  
You deserve so much more  
And I had nothing to give  
I was taking everything  
That's why you toast to our love and it's sad  
Coming up on these drugs  
Just to forget about us  
Just to forget about love

It's better to have loved and lost than never to have loved at all  
But I knew you needed someone who would love you more  
It's better to have loved and lost than never to have loved at all

Yeah, I remember how we met you told me I was your favorite  
We were in that parking lot, I didn't know what to say  
I could tell you were waiting, but Liam Neeson couldn't stop me  
from taking whatever was waiting the home for replacing  
Said I lose it all but there's nothing if I gain you  
I never thought about the pain I bring you, yeah  
Back when I was cruising around with Hayden  
Thinking that our bond would never break and all this paper we  
were chasing  
Lately I just got shit on my mind  
Like I spent 30 on my wrist and was never watching the time  
Now I'm thinking about your life and I've been thinking the mind  
See I was trying to be your king but could have handled my pride  
And you were in it for the long run  
While I was sprinting and thinking I'd never fall huh  
I was winning but only to lose it all  
Because money in the name will never be worth a thing  
Compared to losing your queen, shit

It's better to have loved and lost than never to have loved at all  
But I knew you needed someone who would love you more  
It's better to have loved and lost than never to have loved at all
