

Actions

Willie Jones

Looks like you've spent time typin' that text
You say that you're all mine and wonder what's next
For us

You say that you're doin' all that you can
But to me it sounds just like the same old song and dance
We fight, we break up, we make up
I give you one more chance
Then those chances multiply when I look into your eyes
But I finally realized I'm so done with all the lies because

Actions speak louder than words
Gotta show me
Give a damn what you told me
Come here, baby, hold me
Actions speak louder than words
When you're near me
You say can you hear me
But you don't speak clearly no more

You say me and you, we should be friends
Like a broken record that spins, here we go again
We know it in the end

You say I don't give you all that you need
You need more love, more attention and I don't give you peace
But you break a piece of my heart every time you leave
I don't want to hear it, please girl
I'm down here on my knees
Or just talk up on a scene, baby
Can you prove to me that

That actions speak louder than words
Gotta show me
Give a damn what you told me
Come here, baby, hold me
'Cause actions speak louder than words
When you're near me
You say can you hear me
But you don't speak clearly

Actions speak louder than words
Gotta show me
Give a damn what you told me
Come here, baby, hold me
'Cause actions speak louder than words
When you're near me
You say can you hear me
But you don't speak clearly no more
