

Blue Star

Willie Nelson

You know I'll follow you to the end
Whenever that is, we both will know
How I will follow you again
Anywhere that love can go

If I beat you to the end
I'll had a big head start, it's true
And we're just riding on the wind
Still the same old me and you
And when you reach the heavens bright
I'll be the blue star on your right

I knew the first time that I saw you
That an angel had found its way to me
We'll be back together out there, drifting
Everywhere as far as we can see

If I beat you to the end
I'll had a big head start, it's true
And we're just riding on the wind
Still the same old me and you
And when you reach the heavens bright
I'll be the blue star on your right

If I beat you to the end
I'll had a big head start, it's true
And we're just riding on the wind
Still the same old me and you
And when we reach the heavens bright
I'll be the blue star on your right
When we reach the heavens bright
I'll be the blue star on your right
