

## Live Every Day

Willie Nelson

Live every day like it was your last one  
And one day you're gonna be right  
Treat every one like you wanna be treated  
See how that changes your life  
Yesterday is dead and tomorrow is blind  
And the future is way out of sight  
Live every day like it was your last one  
And one day you're gonna be right

If there someone you love  
You haven't told them  
You wanna tell them today  
If there someone you've wrong  
And you've not said I'm sorry  
It might be a good thing to say  
Pick up the phone and send them a message  
It's time to make everything right  
Live every day like it was your last one  
One day you're gonna be right

Live every day like it was your last one  
And one day you're gonna be right  
Treat every one like you wanna be treated  
See how that changes your life  
Yesterday is dead and tomorrow is blind  
And the future is way out of sight  
Just live every day like it was your last one  
And one day you're gonna be right

Live every day like it was your last one  
And one day you're gonna be right  
Treat every one like you wanna be treated  
See how that changes your life  
Yesterday is dead and tomorrow is blind  
And the future is way out of sight  
And just live every day like it was your last one  
And one day you're gonna be right  
Live every day like it was your last one  
And one day you're gonna be right
