

## Me and You

Willie Nelson

Turn the sound down on my TV  
I just can't listen any more  
It's like I'm in some foreign country  
That I've never seen before

So come now here to think about it  
What in the hell are we goin to do?  
Cause after all is said and all is done  
It's just me and you

It's just me and you  
And we are definitely outnumbered  
There's more of them than us  
Just when you think you made a new friend  
They throw you under the bus  
So it's just me and you  
It's just me and you

I had a friend I used to talk to  
We used to both sit on the fence  
But anymore I can't relate to him  
'Cause he ain't got a lick of sense

So now I just ask you the questions  
But I'm the one I'm talkin' to  
The world has gone out of its mind  
Except for me and you

It's just me and you  
And we are definitely outnumbered  
There's more of them than us  
Just when you think you made a new friend  
They throw you under the bus  
So it's just me and you  
It's just me and you  
Yeah it's just me and you
