

Partners After All

Willie Nelson

Wishing on a star might be old-fashioned
You have failed a million times before
But for me it's working to perfection
Who could ask for anything more?

It's brought us to the days of rockets
Through hard times with empty pockets
But now and then stars are known to fall
And I need to know that we're still partners after all

Slide over closer to me, honey
Just like the night I promised you the moon
Every time we touch each other
Always gets me there so soon

Now and then stars are known to fall
And I need to know that we're still partners after all

(And I need to know...)

Slide over closer to me, honey
Just like the night I promised you the moon
Every time we touch each other
Always gets me there so soon

Now and then stars are known to fall
And I need to know that we're still partners after all

(After all...)
