

# Heritage

## Wind And Fire Earth

The boys  
We're just chillin' with Eart, Wind & Fire  
This is my desire  
Talking 'bout culture  
I'm a vulture  
Just like the beat

Chillin' with Earth, Wind & Fire

Everybody take a look around  
What do you see  
When I look  
There's faces everywhere  
Lookin' back at me  
Their eyes keep telling me stories  
Don't understand  
In my mind  
There's many, many questions  
Bout who I am

Just be proud of the land  
Where your blood comes from  
No one can take away  
What you have done  
Hold your head up high  
Cultures stand eye to eye  
One people living under one sun

Be proud  
Sing it out loud  
Take your rightful place  
It's you heritage  
So stand tall  
Don't be small  
Show true face  
It's your heritage

Everybody walks a little different  
To keep the pace  
Gotta have pride  
Just to be a winner  
In the human race  
In school, the rules don't fly  
Out on the street, tell me why  
People of the nation can't feel the same beat

We're living in a colorful world  
All shades of love  
Each carrying a ray of hope  
Sent down from above

Yo Marice: break it down for me allright  
The Boys chillin' wit Earth, Wind and Flames  
They asked us to sing a few notes  
So we came

Realized the meaning of the song  
So we sung  
With all our heart and soul  
And hopefully we brung  
A message to all  
To not be small  
To stand up tall  
And to give it your all  
Let's have a ball y'all  
Pump it up!
