

Spend The Night

Wind And Fire Earth

You're like no one
else that I have loved before
There's a certain something in my heart
For the first time in my life I know for sure
You're the love that I've been looking for

A few unsettled differences is where we stand
With a little effort we can them out
I just want to hold you in my arms again
Find it in your heart to let me in

I want to spend the night with you
Make love like we used to do
Oh, I want to feel a fire within
I want to fall in love again
After we get through
I want to spend the night with you

There's a full moon shining in the sky above
Let's don't waste this night on sad goodbyes
After all it's you that I've been dreaming of
Let's give into making up
