

# Close To The End

Wind Rose

Close  
Close to the end as I believed

Stay here  
Here by my side  
My dear lover  
And please stay awake

Until the night will fall  
Don't leave me alone

Stand here just forever  
One day I will be there  
To your beauty

So  
Now you can sleep and I must leave  
Wind sends my breath  
If she will need me again  
In the creed of heroes

Everybody hear my call  
Everybody marching on  
We'll run before the twilight fades

Far, far away to back again  
It's hard to forget  
We should only reach the end of our grief  
Nothing will ever take us back, we'll fight as one

Never trust a vivid dream  
The guile creeps in us all

"So you fell in my trap  
You won't see the sunrise again..."

Nothing can lock down my path  
I'm still on my way

Blessed by the heroes  
Until my own faith doesn't fall  
It will stand... It will never fall

Blessed by the heroes  
Until my own faith doesn't fall  
It will stand... It will never fall

In the name of freedom  
Beast, I'll make you pay

Too long we have been denied  
The infinite silences  
Have been desecrated by the crying of a war

Blessed by the heroes  
Until my own faith doesn't fall  
It will stand... It will never fall

Blessed by the heroes  
Until my own faith doesn't fall  
It will stand... It will never fall
