

Reject

Windwaker

The voices in my head don't have an answer
Fixated on my mistakes, never to compromise
Reject it, infect it, give up, you can't protect it
Reject it, infect it, give it away

I can't sleep when my mind's wandering
Outside of me, outside of me
I never thought I'd see it all come down
Inside of me, inside of me

It's a cruel reality, you little punk
You face up to demons
Face up to demons
Explore the exponential haze

Turn the fucking page

Careful as we go
The water's splashing over
I feel it getting colder

I can't sleep when my mind's wandering
Outside of me, outside of me
I never thought I'd see it all come down
Inside of me, inside of me

Reality is slowly drifting
The voices in my head don't have an answer
Reject it

Reject it, infect it, give up, you can't protect it
Reject it, infect it, give it away

Careful as we go
The water's splashing over
I feel it getting colder

Love/hate
Can't relate
Love/hate
Cancer state
