

# Tabula Rasa

Windwaker

Whatcha talkin' 'bout?  
I've been round these bends  
All these people come and go, but it's pretend  
Get on the trend, big fish  
Get all the clothes and get all the hos and  
Get on the road with the big wigs  
Always the big squid  
I contradict it, woo

You know that I never back flip  
Maybe you don't but I'm asking  
Keeping the dressing up classic  
Wasted and plastic  
Wasted on passion  
I am the master  
Replacing a star, my star is a sign  
I'm making it mine, I'm doing it fine  
But where is the line, and will it divide?

Climb up the mountain, wipe off the frown and  
Get on the make that work shit  
Come from the ground and run up the power  
All charged up by the blue tick  
I do not claim to know anything  
Tabula rasa is everything  
Fading to black and it's all I'm remembering  
All I'm remembering

I'm dazed  
Swept up taken by the waves  
They keep on getting in the way  
And my mind just scatters  
Tell me that this life don't matter  
Dazed  
Next up making all the waves  
I keep on wishing for the day  
When my mind don't scatter (scatter)  
When this life won't matter  
Life don't matter  
This life don't matter

This my destiny, ain't no besting me  
I'm the meant to be  
This my destiny, missed the empathy  
This the recipe  
This my destiny, this my destiny, this my destiny, yuh  
We match the energy, got the chemistry in serenity now

Keep getting so tired, threw it all in the fire  
My words they roll like a tire  
Flames high in the sky, I'm the guy they hired, flow dire  
Spit truth in the booth, so aloof for the kids to say I'm a liar  
Give em time, hit the vibe and watch them all look around divided

I'm dazed  
Swept up taken by the waves  
They keep on getting in the way

And my mind just scatters  
Tell me that this life don't matter  
Dazed  
Next up making all the waves  
I keep on wishing for the day  
When my mind don't scatter (scatter)  
When this life won't matter

Climb up the mountain, wipe off the frown and  
Get on the make that work shit  
Come from the ground and run up the power  
All charged up by the blue tick  
I do not claim to know anything  
Tabula rasa is everything  
Fading to black and it's all I'm remembering  
Blow out that light
