

One Light to Burn

Winger

Last chance to settle the score
Black ghosts you can't ignore
Now all your days behind you

Eclipsed from all your denial
Look what you've become

One light to burn, watch the wheel turn
Can you change the war you're facing?
One light to burn and there's no return
Can you save the soul you're wasting?

Oh yeah

Staring down the setting sun
Lights fade, nowhere to run
Can't kill the scorn inside you
No

Can you find the high road or are you too far gone?
Was it all a game, baby

One light to burn, watch the wheel turn
Can you change the war you're facing?
One light to burn and there's no return
Can you save the soul you're wasting?

Can you change your fate
What would you create?
Can you make it worth embracing?

Time claims all things
All kings, all queens

Pride falls when the end calls

Need a miracle to find all the pieces of you
Was it all in vain?

One light to burn, watch the wheel turn
Can you change the war you're facing?
One light to burn and there's no return
Can you save the soul you're wasting?

Can you change your fate
What would you create?
Can you make it worth embracing?

Time claims all things
All kings, all queens

Pride falls when the end calls you
