

Mirror Matter

Wintersleep

Pack the bones up in a box
Paper hands and paper clocks
You be who I
Thought you were
I'll be who I think I was

I will be anything
You wish I was

I will be anything
You wish I was

Silhouetted, set adrift
Wipe away the fingerprints
Blink an eye and blow a kiss
Careful what the light catches

I will be ready when
The lights go off
I will be ready when
The lights go off
Will you be ready when
The lights go off?
Will you be ready when
The lights go off?

Happiness, it's all around you
Happiness, it's all around you
Happiness, it's all around you
Happiness, it's all around you
Happiness, it's all around you
Happiness, it's all around you

I will be anything
You wish I was
I will be ready when
The lights go off
I will be ready when
The lights go off
I will be anything
You wish I was

(You don't feel it all around you)
Happiness, it's all around you

(You don't feel it all around you)
Happiness, it's all around you

(You don't feel it all around you)
Happiness, it's all around you

(You don't feel it all around you)
Happiness, it's all around you

(You don't feel it all around you)
Happiness, it's all around you

(You don't feel it all around you)
Happiness, it's all around you

(You don't feel it all around you)
Happiness, it's all around you

(You don't feel it all around you)
Happiness, it's all around you
