

Someone, Somewhere

Wintersleep

My life, when in my life, you come back to me
I can only recognize my eyes when you look at me
Find me in your eyes, I'm gone, fallen out of place
I believe you, anything you say when you look at me

Only I know where your love flows
Only I know where your dreams go

Wind me in the wind somewhere's of your melodies
I can only recognize my face when you look at me
Lie, lie, to lilac heart, the anatomy
Of a silence a half world apart when you're next to me

Only I know where your love flows
Only I know where your dreams go

Only I know
Only I know
Only I know
Only I know
