

Drive

With Confidence

We could get so far away

I look around
Lonely faces, worn down places
Do you want out
From this taste and from this town?

I called you out
For you to meet me so discreetly
And we'll drive South
And burn this whole place to the ground

We could get so (get so)
We could get so far away
We could get so (get so)
We could get so far away

Look around
At the bright lights
At the night skies
At the sound
Of the long road with us now

And when it comes to me it's always just the little things
It's just the little things that will always guide me
Let's take off and break from this place
This taste and from this town

We could get so (get so)
We could get so far away
We could get so (get so)
We could get so far away
We could get so (get so)
We could get so far away
We could get so (get so)
We could get so far away

(We could get so (get so)
We could get so far away
We could get so (get so)
We could get so far away)

We could get so (get so)
We could get so far away
We could get so (get so)
We could get so far away
We could get so (get so)
We could get so far away

We can get so far away
