

Let Us Unite

Wizard

We march on, day by day
The shield of fear in our hands
The way is dark full of hate
But it's not our stroke of fate

We run around our minds are empty
With bleeding hearts of stone
Overload seem in the eyes
Drowning the sorrows of life

Come give me your hands
Together we are strong
Let us unite against the dark

Holding the banner of peace
Guitars instead of arms
Don't fear the dark side of life

We adhere to god waiting for a sign
There is no before and no turning back
The miracle missed in all its glory
You live - wake up and fight

We need to feel the beauty together
The colour does not matter
We must believe in ourselves
Bound by metal and steel
