

Stardust

WizTheMc

Yuh
Resolution master
No one did it faster
New stage is in astral
Before you leave say hello
I want to say hello
I wonder why
I want to know who you really are
Show me your deepest scars
We can go so far
There's something in the stars
There's something in the stars

Maybe it's us
Maybe it's us
Maybe it's
Stardust finding ways to the car rush
Mommy waiting
No I'm 18
Now the car washed
Memories not washed away
On the way to finding ways
Deeper than waves
Sounds of the lake
I try to stay brave
I know that I got faith
God has a plan for every face

This what I want
Stardust and the songs
Stardust and the sun
Stardust
This is what I want
Stardust and the songs
Stardust in the sun
Stardust
This what I want
Stardust and the songs
Stardust and the sun
Stardust

I have the feeling
That I get directed
Before I see it
I'm at the next step
I forget getting older
Forget that winters colder
I didn't stop with the Yoda
On the stage to show her
It's a lie if I said
I don't want to know her
She and me
Gon' live 'til we find a place
To be free
She A1 and I see
Together we our ABC
Live 'til we rest in peace

But what if we'd never meet?
What if
I'm to blind to see
And you was always next to me
This shit wouldn't
Appear on tv

I know he proud
Proud of us all
We meant to break down walls
Like leaves we fall
The cheese is on
Let's leave our wrongs
We high on songs
We started In stardust
Rapping like carter
Every summer gets hotter
I want to call her
But no number in my phone
I'm just gone of patrone
Home alone
The soul got us started
So let's go

This what I want
Stardust and the songs
Stardust and the sun
Stardust
This is what I want
Stardust and the songs
Stardust in the sun
Stardust
This what I want
Stardust and the songs
Stardust and the sun
Stardust
