

Borrowed Time

Woe, Is Me

It's so hard to watch this take everything
'Cause I know you'll never be the same
And I know that I would give anything
For you to remember my name
Always taking pictures in my mind
So when you leave this place
I'll look back on all of the memories
To fill this empty space

The next time you see me, will you believe me?
When I say you've known me my whole life
Staring in your tired eyes
I know we're on borrowed time
And I know what comes next
But I'm not prepared yet
To say goodbye and watch you fade away
All your memories erased
And I'll just be another face

It tears me apart 'cause I still see the spark
Of the one who would protect me
I feel in my heart that the light's getting dark
And I hope you won't forget me
'Cause I feel in my heart that the light's getting dark
I hope you won't forget me

The next time you see me, will you believe me?
When I...

The next time you see me, will you believe me?
When I say you've known me my whole life
Staring in your tired eyes
I know we're on borrowed time
And I know what comes next
But I'm not prepared yet
To say goodbye and watch you fade away
All your memories erased
And I'll just be another face
