

Peaking through your speakers time and time again  
Do you believe me now? I said I'll always win

This journey hasn't been an easy one  
We faced some hard times  
And we watched the death of innocence before our eyes  
But the years flew by and we made peace with the past  
Found ourselves face to face again

We spent ten years on the road  
A decade in the dust  
Small towns and big dreams  
We watched that all fade to rust  
This ain't supposed to be a eulogy  
It ain't written out of spite, no  
We're no strangers to second chances  
We're doing this one right

I never knew when we were younger  
All the ways our lives would change  
Made amends and realized  
All the things that matter stayed the same, oh yeah  
Cause we came back stronger than we've ever been  
It's been a long time comin'  
And we haven't reached the end

We spent ten years on the road  
A decade in the dust  
Small towns and big dreams  
We watched that all fade to rust  
This ain't supposed to be a eulogy  
It ain't written out of spite, no  
We're no strangers to second chances  
We're doing this one right
