

Black Widow

Wolf

In the darkness when shadows are real
They seem to come alive
Under the streetlights' hollow glare
Just where the rain eats the light
The light
The light

Walk alone, by myself in the street
When the city is asleep
That's when I see her just like in my dreams
I know she wants me alive
Alive
Alive

She is lurking in shadows
Weaving her web
She's a master deceiver
Surrounding her prey
She's a hunter in high heels
Your mistress and doom
She's a modern black widow
Playing you for a fool
You fool!

Black widow
Black widow
Black widow
Black widow

In the darkness when shadows are real
Inside the depths of my mind
That's when I see her emerge on the screen
I know she wants me alive

The black widow
Black widow
She's a black widow
The black widow wants me alive
Alive
Or dead
