

Dust

Wolf

The universe is going cold and so am I
What little sanity I had has slipped my mind

Hear these words
An ode for the damned

From the sorry second, we were born we're born to die
The hook you swallowed pulls you to the other side

So, hear these words
An ode for the damned

Realize we are but dust
Realize we are but dust
Just dust on a speck of dust

In a godforsaken galaxy so far away
The watchmaker has left the scene and thrown away his work
And a chilling wind is bringing in the singularity
There will be nothing to remember and no one left to care

Realize we are but dust
Realize we are but dust
Just dust on a speck of dust
Just dust on a speck of dust
